

Lord Toad's Terms of Service

Timeframe and payments

All commissions, once I am paid, will be afforded a 2-month time frame for completion. If not finished, the commissioner can ask for a refund or request a new timeframe. I will contact commissioners before the 2-month deadline if I am behind.

Payments for art will be made when I have finished the sketch and had it approved by the commissioner, or, in the case of a 3d commission, finished the 3d model concept sketch.

Payments can be made through Venmo or PayPal in USD.

I would like communication to be done through Discord.

I have a public spreadsheet showing how far along I am on all my current commissions, along with a waitlist.

To not overwork myself, I will only be taking around 4-5 3d commissions a month, while 2d artwork limit I will feel out based on my workload. Commissioners can request to be waitlisted if they are ok with waiting for me to start on their art.

I will contact commissioners on my waitlist, and if they do not respond within 24 hours, I will contact the next person down.

Once I have gotten my sketch approved, payment has been sent, and I am within my two-month timeframe, I will not be giving refunds.

I will send a WIP after each stage of my process for revisions to be done at whatever stage I am on. Ex: revisions on poses and expressions during an illustration's sketch stage, revisions to clothing or other details during the linework stage, and revisions to colors during the coloring stage. The same goes for 3d models. I will not fully redo something if I am past the steps for it, but I will work with the commissioner.

I will not send a refund if all my stages have been approved and the commissioner claims not to like the final product.

If a lot of changes and revisions to the artwork are being requested mid-commission, I may push the timeframe of completion back without offering a refund.

Files will be delivered through Google Drive, and commissioners will have 2 weeks to download their files.

Commissioner's Usage

The art and models I produce may not be run through any AI programs and cannot be used for NFTs.

Personal use of my art is up to the commissioner as long as I am given credit for my art and it's used within lawful bounds.

3d models and 2d artworks may be printed and distributed personally, but printing and selling my models or illustrations on a commercial scale is not allowed unless it is discussed with me beforehand, and a fair price for a commercial artwork is met.

3d models may be used for commissioners' online animations or other content as long as credit is given.

VR chat models may be used for the commissioner's own online content without written credits, as long as I get credited if asked.

My usage

I will keep copyright to my work unless another agreement is met.

I have the right to post and use my commissioned work for portfolio pieces and to promote myself; however, character credits will always be given to the commissioner.

Pre-made characters

Any characters bought from me may be used for personal use and online content as long as character design and/or model credit is given to me.
